✉ vinayhuragi@gmail.com ☎ 9019527920 [in LinkedIn](#) [🔗 Portfolio](#) [🐙 Github](#)

Profile

Results-driven **Software Developer** with strong expertise in **Java** and modern web technologies. Experienced in building scalable full-stack applications using **React.js**, **Firebase**, and **MySQL**. Demonstrated ability to design efficient backend systems, implement **RESTful APIs**, and develop responsive user interfaces. Passionate about writing clean, maintainable code using **MVC Architecture** and **SDLC** best practices to solve real-world problems

Education

Bachelor of Engineering - Computer Science, 2021 – 2025 | Hubli, Karnataka
KLE Institute of Technology, Hubli

Skills

Programming Languages: Java, JavaScript, SQL

Web Technologies: HTML5, CSS3

Frameworks & Libraries: Firebase, REST APIs, React.js

Tools & Technologies: Git, Eclipse IDE, Visual Studio Code (VS Code), MySQL Workbench

Core Concepts: Object-Oriented Programming (OOP), Problem Solving, DBMS/RDBMS, MVC Architecture, SDLC

Projects

Student Management System (Java, MySQL, JDBC, Servlets)

- Developed a full-stack web application to manage student data, course enrollment, and academic records using **MVC Architecture**.
- Optimized **CRUD operations** using **JDBC**, improving database retrieval speed and data consistency.
- Designed and normalized relational database schemas (RDBMS) to ensure scalable data management and integrity.
- Engineered backend services using **Java Servlets** and managed deployment on **Apache Tomcat**.
- Applied **OOP principles** to create modular, maintainable, and reusable code structures.

Netflix Clone (React.js, Firebase, REST APIs)

- Architected a responsive video-streaming interface with secure user authentication via **Firebase Authentication**.
- Developed a library of **reusable React components**, significantly improving UI scalability and reducing development time.
- Integrated Firestore for real-time data handling and dynamic content updates.
- Consumed REST APIs to fetch and display movie data dynamically.
- Designed a fully responsive UI for seamless cross-device experience.

Music Player Web Application (HTML, CSS, JavaScript)

- Built an interactive browser-based music player featuring custom playback controls and a sleek, user-centric UI.
- Leveraged the **HTML5 Audio API** to manage sophisticated playback features including volume modulation and progress tracking.
- Optimized front-end performance and ensured cross-browser compatibility for a seamless user experience.
- Deployed the application using **Vercel** and **GitHub Pages** for high-availability hosting.

Certificates

- Prompt Engineering for ChatGPT – GreatLearning Academy
- SQL by HackerRank – HackerRank
- Java by HackerRank – HackerRank
